

AIMAN HAFEEZ

AI / ML Engineer · Full-Stack Developer

Sukkur, Pakistan | +92 311 388 3369 | aiman3.22bscs016@bnnbwu.edu.pk | [LinkedIn](#) | [GitHub](#)

EDUCATION

Bachelor of Science in Computer Science

Dec 2022 – Sep 2026

Begum Nusrat Bhutto Women University, Sukkur | CGPA: 3.89 / 4.0

Relevant Coursework: Machine Learning · Artificial Intelligence · Database Systems · Data Structures & Algorithms · Cloud Computing · Linear Algebra · Object-Oriented Programming

WORK EXPERIENCE

Full-Stack Developer Intern — Systems Limited

Jul 2025 – Aug 2025

Pakistan's leading software house | React · Flask · PostgreSQL · Socket.IO · REST API

- Built and deployed full-stack features for a production web application in an Agile team; implemented JWT authentication, REST API endpoints, and GitHub API integration.
- Engineered a real-time communication system using Socket.IO, supporting concurrent user sessions — gained hands-on experience with scalable, production-grade architecture.
- Participated in code reviews, sprint stand-ups, and team ceremonies alongside senior engineers, contributing meaningfully to a live codebase throughout the internship.

Intern — Inter Services Public Relations (ISPR)

Jan 2026 – Feb 2026

Government media organization

- Completed a structured professional development program with senior professionals, strengthening analytical thinking, communication, and the ability to operate in high-accountability environments.

PROJECTS

Forecasting Liquidity Risk & PSX Firm Classification (FYDP) Python · Scikit-learn · Pandas · Supervised & Unsupervised ML

- Built ML models to forecast liquidity risk factors and classify PSX-listed firms into high-risk and low-risk categories — applying AI to a real-world financial decision-support problem.
- Analyzed structured financial datasets using Python, producing risk-based classifications that could support analyst and operations teams in large-scale organizations.

DevMatch — AI-Assisted Developer Collaboration Platform Flask · React · PostgreSQL · Socket.IO · GitHub API · JWT

- Designed and built a full-stack platform from scratch with REST APIs, real-time messaging, and GitHub integration — delivering a working product with live multi-user support.
- Implemented microservice-friendly Flask backend with JWT auth, project workflows, and concurrent real-time chat, gaining practical exposure to enterprise-grade system architecture.

Stock Return Prediction Using ML Python · PyTorch · Scikit-learn · SVR · LSTM

- Built a time-series prediction system using SVR, LSTM, and Gradient Boosting on MSFT & GOOGL datasets, evaluated with RMSE, MAE, and R² — combining quantitative analysis with ML.

Movie Recommendation Engine Python · Pandas · Scikit-learn · Streamlit

- Designed a content-based recommender using TF-IDF and cosine similarity across 10,000+ titles; deployed as a real-time Streamlit web app with sub-second inference.

ACHIEVEMENTS & ACTIVITIES

- Collaborated on "Gen AI Agro Drone Development" — an AI-based Agile research project addressing agricultural challenges in Pakistan; presented findings at the Provincial Assembly of Sindh.
- Recognized for innovation and selected for an Aurat Foundation award, received at CM House on 13 Feb — acknowledged for contribution to technology and community impact.
- Women in Tech advocate from a women's CS university; developing 'Legal AI' FYP applying ML to justice and legal processes — driven by Engro's ethos of using technology to solve Pakistan's pressing issues.

TECHNICAL SKILLS

ML / AI: Scikit-learn, PyTorch, TensorFlow, Pandas, NumPy, NLP, TF-IDF, Supervised & Unsupervised Learning, LLMs, Prompt Engineering

Languages: Python, SQL, Java, C++, JavaScript

Backend / Full-Stack: Flask, React.js, PostgreSQL, MySQL, Socket.IO, JWT, REST APIs

Data & Viz: Matplotlib, Seaborn, Streamlit, Jupyter Notebook, Google Colab

Tools & Practices: Git, GitHub, Docker (basics), Agile / Scrum, version control, data preprocessing, Microsoft Office
